

## **The Urban Electric Mobility Vehicles Initiative (UEMI)**

Increase the market share of electric vehicles in cities to least 30%, of all new vehicles (incl. cars and motorized 2-3 wheelers) sold on annual basis by 2030 while simultaneously developing the enabling infrastructure for their effective use;

Through increased use of electric mobility for passenger transport (both private and public) as well as freight transport combined with measures to reduce the need for individualized motorized transport and increased use of public and non-motorized transport achieve a 30% reduction of CO2 emissions in urban areas by 2030.

Low Carbon Transport

# TRANSPORT TACKLES CLIMATE CHANGE @ TRANSPORT DAY 2014

**Sunday 7 December 2014**  
**09:00 - 18:00**  
**Sheraton Hotel Lima, Lima, Peru**

**Transport Day**  
**2014 • Lima**

A special event focussing on land transport and climate change. International experts, the scientific community and Parties will demonstrate the potential contribution of land transport in climate change mitigation and adaptation.
