CODATU: Agir pour une mobilité soutenable dans les villes en développement
CODATU est une association de droit français qui anime un réseau international d’expertise sur les transports et la mobilité dans les villes des pays en développement
CODATU International Conferences
17 Conferences organized since 1980

- Since 1980, CODATU organizes international Conferences every two years on urban mobility in developing countries. These events look to design and propose innovative solutions and new lines of research adapted to local contexts in those countries.

- Historically, CODATU international conferences have been organized in a different city of Africa, Latina America, Asia and Europe.

- CODATU organizes those conferences through a collaboration with local and international partners. By doing so, CODATU aims at gathering members of territorial entities, academia, private sector and the civil society, to work together on persistent challenges and future opportunities of the urban.

Urban transport in Latin America has evolved significantly in the past two decades. The projects of massive systems of transportation, in particular the emblematic and worldly recognized BRT systems, have induced big transformations in the mode of urban mobility in the continent.

Big cities and capital cities have implemented mature and multimodal systems of public transportation. Yet, they face many challenges in terms of sustainability, urban and environmental quality of the urban space, accessibility and inclusion.

At this point of their evolution, the Bogota Conference looks to generate discussions, exchange good practices and propose ideas on the future of these systems of transportation and the models of urban mobility that best respond to the needs of the cities in Latin America.
Urban Sustainable Mobility in Latin America
Codatu Bogota 2021

Urban Sustainable Mobility in Latin America
Codatu Bogota 2021 – Partners of the Conference

Codatu organizes the Bogota Conference with the University of Los Andes as local strategic partner and with the support of Transdev as main sponsor:

Transdev is an operator and global integrator of mobility which provides mobility solutions to passengers, local entities and enterprises. Transdev provides 11 million passenger trips everyday through mobility services that include BRT systems, rail systems, buses, non-motorized systems of transportation and parking solutions. Transdev is a major mobility stakeholder of the continent, historical operator of the Bogota and Santiago BRT systems.

Los Andes University is a private, autonomous, independent and innovative Higher Education Institution. Its purpose is to deliver excellent education that contribute to close the knowledge gap between Colombia and world scientific advances.

The University gathers more than 18.000 students, 1.700 teachers and 155 groups of research. The University is a scientific reference on mobility issues at continental scale, especially thanks to the consulting and research projects of its Urban and Regional Sustainability Studies Group.
